

2019 Elementary Student Ag Day at Millerstown Park

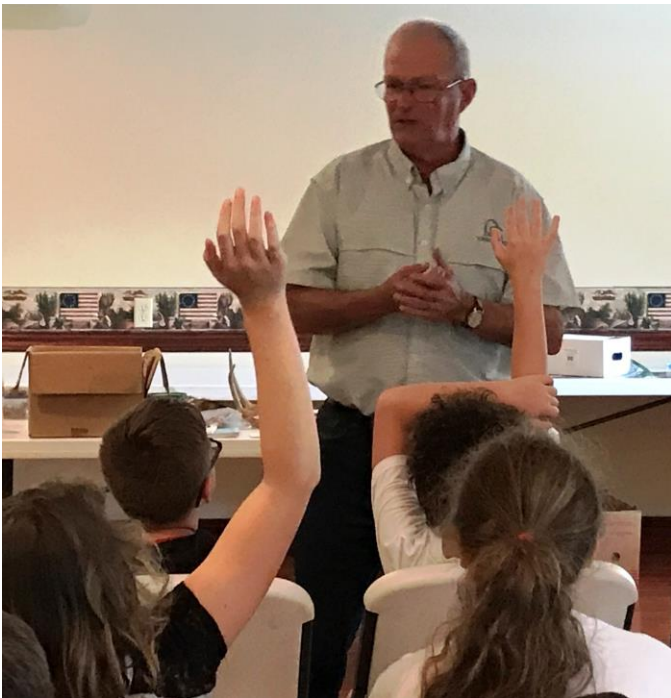

A joint educational project of Perry Valley Grange & Greenwood FFA

Grange volunteers, including State President Wayne Campbell (left), prepared and served mid-morning snack and noon lunches to about 200 students, teachers, parents and helpers at the May 23rd field day for fourth grade students from Newport and Greenwood Elementary Schools.

The butterfly tent was a popular learning station. Preparing for this required purchase of and caring for butterfly cocoons until the butterflies emerged.

Retired teacher Sam Ritzman each year gives an interesting presentation at Ag Day on various animals. Students can examine such things as bones, teeth, hides, etc.

This station emphasized the importance of the dairy industry, complete with a young calf. At other stations, students had the opportunity to interact with animals including chickens and rabbits.
